

Enjoy radiantly beautiful skin throughout the summer – thanks to medisana’s facial beauty aids

Neuss, 13.05.2020. When the temperatures begin to rise in spring and summer, our well-being also improves as we enjoy spending more time outside. It’s a good time to pay special attention to our skin, as it is increasingly exposed to the weather and environmental influences. Our faces in particular often suffer from the effects of the sun, wind, rain, pollen and dust. medisana’s facial beauty aids will help to get your skin fit for the outdoors, ensuring that you go through the summer with a radiantly beautiful complexion.

For many people, facial cleansing is a particularly important self-care ritual. medisana’s **FB 885 facial cleansing brush** cleans your skin thoroughly yet gently. It frees the sensitive skin on your face from impurities and dead skin cells for a convincing cleansing effect and an even more radiant complexion. It is equipped with four different attachments for various skin types and uses (sensitive skin, normal skin, peeling, cosmetic sponge), as well as a practical skin zone timer. Thanks to gentle vibrations, the facial cleansing brush softly stimulates the circulation in your face, thus promoting the optimal absorption of skincare products and leaving your skin looking healthy and fresh.

When combined with daily cleansing and skincare, the medisana **FSS facial sauna** can work wonders on your skin. It opens the pores, cleanses the skin and relaxes the facial features with its moist, soothing heat effect – a pleasant cosmetic experience that also increases your physical and psychological well-being. The FSS facial sauna is also supplied with an additional attachment which enables you to add a feel-good aromatic treatment to the experience.

Radiantly beautiful skin, free from annoying pimples, pustules and wrinkles – it’s what we all want, right? medisana’s beauty light therapy treatments will help you to achieve this. Light therapy is a clinically tested anti-acne treatment offered in dermatological practices. It is based on the interaction of red and blue light rays that gently penetrate the skin and complement each other perfectly. medisana’s **DC 300 LED light therapy pen** offers light therapy in a handy form. It offers two therapies in one device: the blue light has an

antibacterial effect and fights the bacteria that cause acne, while the red light supports skin rejuvenation and reduces the appearance of fine lines and wrinkles. Using the pen for five minutes twice a day has been proven to be effective. Individual (acne) pimples can be quickly treated in a targeted manner – and it's not only adolescents who suffer from facial impurities. The LED light therapy pen DC 300 is lightweight and handy – saving space in your bathroom at home and perfect for travelling.

Of course, every beauty treatment needs to be carried out in front of a mirror for best effect – ideally a special cosmetic mirror, such as medisana's practical **CM 850 cosmetic mirror**. Thanks to its large surface area (diameter 19 centimetres), bright LED lighting and five-fold magnification, it ensures that you can see even the smallest detail. This is particularly important when applying or removing make-up and cleansing your face. Thanks to its increased suction power, the swivelling **CM 850 LED suction mirror** can be conveniently installed in any bathroom without the need for drilling – because its special coating guarantees strong adhesion to all smooth surfaces.

The FB 885 facial cleansing brush is priced at € 79.95 RRP, the FSS facial sauna is priced at € 49.95 RRP, the DC 300 LED light therapy pen is priced at € 39.95 RRP, and the CM 850 LED suction mirror is priced at € 59.95 RRP, and they are all available from specialist retailers and at www.medisana.de.
